BumbleBee-LX™ is a rugged, handheld spectrum analyzer all-in-one system. The calibrated receiver measures popular wireless standards such as RFID, Cellular, PCS, Public Safety Band, SMR and even cordless phones that reside in frequencies 700-2000 MHz.

BumbleBee-LX™ allows users to scan, display and record multiple RF waveforms for network installation, coverage and interference analysis. The color, touch-screen allows field engineers to tap on points of interest in any waveform and then drill down for further analysis. Advanced spectrum analysis features include multiple waveforms with peak hold / search, user selectable packet / interference triggers, spectrogram and histogram. **BumbleBee-LX™** allows for realtime spectral analysis of many wireless standards as well as unidentified RF interference.

BumbleBee-LX is a rugged, water-resistant spectrum analyzer that fits in the palm of your hand.
